

By allowing the NAB to stifle satellite radio's expansion you will limit new technology and limit a valuable service to those members that wish to pay for it. It will not effect local programming in a negative way, completely the opposite by encouraging the local stations to become better at what they do to hold their listeners. In addition, by allowing the NAB petition to pass it will send a message to that the government is willing to limit new technology to benefit corporate greed.
Thank you for your time!

Chris Ortell
